WE PRODUCE GARDEN PRODUCTS FOR PROFESSIONALS

## WATER BLOCKS

### Product description

Unique Corten Steel or Aluminum water ornaments. We can produce almost any standard RAL-colour in Aluminum (start-up costs apply).

The water bubbles up from a stainless steel nozzle with LED lighting in the middle of the top plate. The water then runs evenly along the sides of the block into the underground reservoir and is subsequently pumped up again. Comes with pump, LED lighting and nozzle.

## SPECIFICATIONS

### General information

Our water blocks consist out of:

- Thickness: Corten Steel 3 mm
- Thickness: Aluminium 4 mm
- 5 year warranty (descending)
- Incl. LED-fountains (1 year warranty)
- Incl pump (2 year warranty)

### Corten

- Brown-orange rust colour
- Delivered un-rusted
- Rust process takes 4-5 months
- BIO rust accelerator available

### Aluminum

**Stock colours** RAL 7021, RAL 9016.

Available in almost any RAL colour (start-up costs apply).

## IMPORTANT

### Points of attention

- The pH of the water must be neutral (7).
- The products must be unpacked immediately after delivery.
- We only use Corten steel type S355J0WP.
- Coastal areas: We do not recommend using Corten steel within a radius of 2 km from a coastline.
- During the weathering process rust residue can come off the product.
- Drilling / grinding in the material is not permitted.

### Maintenance

- **Note!** The LED fountains may become clogged if green waste ends up inside the water table. The fountains are easy to open and clean. After cleaning the fountains, also check the pump for blockage. If clogging happens frequently, place a filter between the pump and the fountains.
- Annual cleaning by removing coarse dirt by with clean tap water.
- Aluminium features must be maintained (cleaning and removing limescale)
- **Note!** Do not use a high-pressure cleaner or abrasive sponge.
- Adezz maintenance products are available (page 4).

# PLACEMENT

## INSTALLATION

1. Dig a hole in the ground at least as big as the base of the water block. The depth depends on the height of the base of the water block and the thickness of the foundation it sits on.

2. Place a solid and level foundation at the bottom of the hole. Make sure there is an opening in the centre through which the power cables and water drainage can run.

3. Next place the base of the water block on the foundation and place the pump inside.

4. Lay the top of the water block on its side next to the base so the hose from the fountain can be connected to the pump.

5. Then run the pump and fountain power cord through the overflow and out from under the water block.

6. Cover the base of the water block with gravel, it completely disappears from view and the water seems to run straight into the ground.

## USAGE IN WINTER

- Always remove the plug from the power socket in case of frost
- A pond de-icer is recommended (for sale at any garden centre or DIY store)
- Pump can remain in the water if the above mentioned conditions are met
- You can also remove the pump from the pond and allow it to overwinter under water in a frost-free place

# ACCESSORIES

## ACCESSORIES

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit [www.adezz.com](http://www.adezz.com) for a complete overview of our accessories.

### CLEANER & PROTECTOR

We recommend cleaning our products at least twice a year. For optimal results, use the ADEZZ BIO Cleaner & Protector. Always read the descriptions on the packaging carefully before use.

### RUST ACCELERATOR

Our Corten Steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

### DESCALER

We recommend the use of ADEZZ BIO Descaler + to remove limescale from your products. Always read the directions on the packaging carefully before use.

### CORTEN VARNISH

Corten varnish can be applied to the Corten Steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.
