TRIANGLE

The TRIANGLE, as the name suggests, is a triangular planter. Thanks to its specific geometric triangle shape, it is very suitable for filling difficult spaces in the garden in various playful compositions. Or to very simply fill an internal corner.

FEATURES

A new shape: a geometric prism with sleek, angular sides. Our corten steel TRIANGLE has a warm appearance and can be beautifully combined with other corten steel elements in the garden. The TRIANGLE is for those looking for something just a little different!

The planter's warm appearance comes from its distinctive orange-brown patina, which is the result of a natural layer of rust. Another name for corten steel is weathering steel: weather conditions have a positive effect on this planter.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion so you can enjoy the TRIANGLE for many years.

BANDU

This sustainable planter is characterised by the variety of board widths used in its construction. Thanks to the recessed base, the BANDU appears to float, giving it a graceful appearance.

FEATURES

Bring a sustainable element into your garden with our BANDU: a planter made of bamboo. The natural appearance of bamboo will look beautiful in any garden. To help the bamboo retain its dark brown colour, treat with a protector once a year. If left untreated, the bamboo will develop a natural grey colour, which will also look lovely in your garden. The varibo pattern gives this planter character.

Bamboo is becoming increasingly popular as an element in gardens and this is reflected in our products. It is an excellent alternative to tropical hardwood. This is because bamboo grows much faster than hardwoods and can therefore be harvested much sooner. Tropical hardwood forests take 60 to 120 years to regenerate after being felled, while bamboo takes only 4 to 6 years. The plant regrows quickly – so quickly, in fact, that it is necessary to cut it back regularly.

ONYX

The ONYX is a welcome addition to our collection. This planter has a beautifully balanced organic form, giving it an absolutely unique appearance.

FEATURES

The gorgeous curves of the ONYX will add style to your garden. Its rounded shape gives it a soft look. Corten steel adds warmth thanks to the orange-brown patina on the metal. This patina is formed by a natural layer of rust. Another name for corten steel is weathering steel: weather conditions have a positive effect on this planter.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion and makes the product long-lasting.

CARREZ Connect coated steel

This square planter will look great in gardens that have clean lines. The sleek, double-turned upper edge gives it a sturdy appearance. The CARREZ is also ideal for use as a divider in hospitality venues.

FEATURES

The CARREZ galvanised steel planter gives gardens a timeless look. The planter's finish ensures that it is corrosion resistant and will last for many years outdoors.

Galvanised steel has a protective layer of zinc. Once constructed, the coated steel planter is given several finishing treatments. The metal is roughened to allow better adhesion of the powder coating. This is applied with a strong adhesive primer. Finally, the planter is finished with a hard topcoat of Qualicoat class 2. These layers ensure that the planter is of very high quality and scratch resistant.

Metallic line

ADEZZ has released a new coating to make your garden even more beautiful. The warm metallic colours bring an extra dimension among all the green, but also looks great indoors. Every incidence of light gives a unique reflection.

Metallic powder coating is a type of coating that uses metallic flakes to create a shiny, reflective finish. The metallic flakes are made of metallic flakes such as copper, bronze or gold. The metallic flakes are mixed with the powder coating and then applied to the product. To do this, the surface is heated to melt the powder and create a durable, long-lasting finish. This makes the coating resistant to various weather conditions.

Vintage metallic line

ADEZZ has released a new coating to make your garden even more beautiful. The vintage metallic colours are inspired by the vintage trend. The coating has a random pattern applied by hand. This gives your garden an exquisite look. Do you want something different? Then this coating is perfect for you!

Metallic powder coating is a type of coating that uses metallic flakes to create a shiny, reflective finish. Our vintage metallic line has a slightly mottled powder coating. The metallic flakes are made of metallic flakes, such as copper, bronze or gold. The flakes are mixed with the powder coating and then applied to the product. To do this, the surface is heated to melt the powder and create a durable, long-lasting finish. This makes the coating resistant to various weather conditions.

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
