SEARE family

SEARE Family

Food brings us together. It allows us to discover new people, cultures, and lifestyles. In a world that's becoming increasingly polarised, it's more important than ever for us to continue to meet each other. Society is shifting further onto the online world. We're always on the go and don't take enough time to rest and relax. We want to invite you to live in the present: put away your gadgets, cook a meal together and have real conversations. When we're celebrating the important milestones in our lives, we eat together.

Food is a traditional part of our most beautiful moments. Birthdays, weddings and births: we want to make these moments extra special. Humans are instinctively attracted to fire. As well as providing warmth, it gives us a sense of security.

Our company's roots are in the burgundian region in the south of the Netherlands. Eating together is part of our cultural character, so we understand the art of hospitality. The SEARE family is our way of passing this on.

A new standard. As a source of warmth and for cooking!

DESIGN

The warm, soft and minimalist shapes reflected in the Japandi are timeless and guiding contemporary design. For the SEARE family, aesthetics, in addition to functionality, have been key to the design.

MATERIALS

In our search to find the right materials, we leaned strongly towards those that were warm and natural. We chose bamboo and corten steel, which have the added advantage of being maintenance-free and ideal for outdoor use. SEARE products retain their quality without the need for preservation with coatings or chemical treatments. In fact, exposure to the weather will enhance the natural look of these products over time.

Sustainability

Innovation is a core FORNO value. One aspect of this is making more intelligent and economical use of the materials used in our products. The SEARE series is made from bamboo and corten steel. Both these materials are remarkably durable.

BAMBOO

Wood and plastic are often used for handles because of its tactile qualities and limited heat conduction. Bamboo is a more sustainable alternative, therefore we use this in the SEARE series.

Bamboo has the same tactile qualities and combines this with a natural appearance and a long lifespan. Moreover, it grows very fast and can be felled and regrown 8 times more quickly than hardwood. During its rapid growth, bamboo also stores large quantities of CO₂.

- Bamboo produces 35% more oxygen than an average tree of the same size.
- Up to 1,696 tonnes of CO₂ uptake per m³.
- Harvested from FSC certified forests.
- Fully and easily recyclable.

CORROSION TENSILE STEEL

The main material used in the SEARE series is strong and hard-wearing corten steel. The corten steel we use is also very thick (The corten steel used has a large thickness), which ensures a long lifespan without the need to apply any extra protective coating. Corten steel is 100% circular: old corten steel products can be used to make completely new ones!

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust that prevents further rusting (oxidation). This means there is no need to use chemical treatments to prolong the life of corten steel. Our products are manufactured in Europe using only European corten steel.

FORNO

IGNITE YOUR NATURE

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. FORNO offers a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All our products have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from fire tables to exclusive outdoor kitchens and from sturdy fireplaces to timeless wood storage.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
