IGNITE YOUR NATURE

**STATION Standard**

# STATION Standard

Our workstations are perfect for creating additional workspace in your outdoor kitchen. With the warm and soft design, they perfectly complement our SEARE series. This way you will always have enough space to prepare the most delicious dishes.

## FEATURES

FORNO workstations are a great addition to your outdoor kitchen. The bamboo-finished workstations provide more space to make your favourite dishes. The curves give them a warm and soft look. At the bottom of the workstations is room for storage of firewood or other items. There also are hooks for hanging tools or tea towels.

The workstations are made of corten steel, which develops an orange-brown patina over time. Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating of rust prevents further corrosion.

## SPECIFICATIONS

- 5-year guarantee.
- Products are delivered rusted.
- Can be ordered in two different sizes.
- Also available with castors for easy movement.
- Space for storage in the workstations.
- Finished with bamboo elements.

## KEY POINTS TO NOTE

- Use a separate chopping board to avoid damaging the bamboo worktop. Food should not be prepared directly on the worktop.
- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. This moisture can cause stains that are difficult to remove.
- We do not recommend using corten steel within 2 km of a coastline.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the product and stops the rust on corten steel flaking off.

# Maintenance

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit [www.forno.eu](http://www.forno.eu) for a complete overview of our accessories.

## **RUST ACCELERATOR**

Our Corten Steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

## **CORTEN STEEL VARNISH**

Corten varnish can be applied to the Corten Steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

# FORNO

IGNITE YOUR NATURE

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. FORNO offers a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All our products have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from fire tables to exclusive outdoor kitchens and from sturdy fireplaces to timeless wood storage.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
