PLAATSING

PLACEMENT

1. Provide a flat, solid surface. If not done carefully, it can create tension in the product which can result in damage to the product.
2. Reinforcements in products are essential for the construction and dimensional stability, therefore must never be removed!
3. Always provide sufficient breathing space (minimum 1 cm) around the product to prevent moisture trapping.

4. One To Sit storage boxes are always equipped with 2 gas springs that ensure that the boxes open and close in a controlled manner. These gas springs are specially adjusted for the specific storage box and should never be interchanged.

5. In addition to the gas springs, all storage boxes are equipped with a lock and two keys. This way, products can always be stored safely.
