

## SUNBRELLA CUSHIONS

### Product description

Sunbrella is one of the leading outdoor fabrics brands. We have selected a number of colours.

The Sunbrella cushions have an inner filling of polyurethane foam. The fabric is provided with a breathable acrylic coating. This coating ensures that the rainwater rolls over the fabric and will therefore not retract. This prevents the accumulation of condensation and moisture in the pillow and strengthens the resistance to fungi.

The Sunbrella cushions have an inner filling of polyurethane foam and the cushion covers are detachable.

## SPECIFICATIONS

### General information

#### Sunbrella Heritage:

- Fabric made of 50% recycled material

## IMPORTANT

### Points of attention

- All packaging materials must immediately be removed from the products.
- Wash cushions in the washing machine with cold water on the delicate cycle with a standard amount of mild washing powder.

### Maintenance

- Keep the cushions preferably in a dry place, the One to Sit Garden boxes are a perfect storage solution.
