**ONYX**

# ONYX

The ONYX is a welcome addition to our collection. This planter has a beautifully balanced organic form, giving it an absolutely unique appearance.

# Material corten steel

The gorgeous curves of the ONYX will add style to your garden. Its rounded shape gives it a soft look. Corten steel adds warmth thanks to the orange-brown patina on the metal. This patina is formed by a natural layer of rust. Another name for corten steel is weathering steel: weather conditions have a positive effect on this planter.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion and makes the product long-lasting.

## SPECIFICATIONS

- 5-year guarantee.
- Corten steel planters are very robust, hard-wearing, weatherproof, low-maintenance and durable.
- The corten steel has a standard thickness of 2 mm.
- Products are delivered without rust. The corten steel rusting process takes about 4-5 months, depending on weather conditions.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the planter and stops the rust on corten steel flaking off.

## KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop uneven rust patches.
- Ensure proper drainage.
- Do not use an overflow pipe: no excess water should remain in the corten steel planter. This can cause the corten steel to rust through due to the interaction of oxygen and soil.
- Do not use hydro pellets: they retain moisture.
- We do not recommend using corten steel within 2 km of a coastline.
- The weathering process may cause rust run-off.
- The guarantee expires if you drill or grind in a way that is not specified.

# Placement

1. It is important that the product is positioned on a firm, levelled surface. If the ground is not level, the weight of the planter will be unevenly distributed. This can cause stress damage.
2. Tie rods are fitted to the inside of some planters to provide essential structural stability and help them retain their shape. These should never be removed.
3. Always provide enough space around the planter (at least 1 cm) to prevent moisture from becoming trapped near its surface.

# Planting advice

1. Cover the bottom of the planter with a layer of gravel (approx. 10 cm, Ø35 mm grading).
2. Place a permeable anti-root membrane over the gravel.
3. Cover the membrane with soil suitable for your chosen plants.

# Warning

- Do not use an overflow pipe: no water should remain in the corten steel planter.

# Accessories

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit [www.adezz.com](http://www.adezz.com) for a complete overview of our accessories.

## RUST ACCELERATOR

Our corten steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

## CORTEN VARNISH

Corten varnish can be applied to the corten steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

# ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
