Retaining wall seat

Retaining wall seat

Easily transform your retaining wall into a seating area with our hardwood seat. Our retaining walls are the perfect solution for separating lawns, borders and paths. They can also be used as planters and, of course, as additional seating.

Material hardwood

We stock two different types of seats. Both types are available in four sizes. The seats are made of durability class two Garapa hardwood. They are pre-mounted on galvanised steel strips, making the seats simple to install on existing retaining walls. The seat can be fixed to our retaining wall with seating edge to create additional seating in gardens and outdoor spaces.

SPECIFICATIONS

- 5-year guarantee.
- Hardwood seats are strong and hard-wearing.
- We use only hardwood with durability class 2 in our hardwood seats.
- The hardwood has a thickness of at least 21 mm.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. This moisture can cause stains that are difficult to remove.
- All (hard)woods turn grey when exposed to sun, rain and wind. The eventual colour partly depends on the initial colour of the hardwood.
- Wood is a natural product which shrinks or expands depending on temperature and moisture content. Regular oiling helps to stabilise the moisture content and limits shrinking and swelling.
- Use stainless-steel screws. Like almost all woods, hardwood reacts when it comes into contact with iron. This can cause significant discolouration, which can look like mould.
- Remove metal shavings from tools (bits and drills) before use.
- Avoid contact with lawn fertiliser and cement. These contain traces of iron.
- De garantie vervalt wanneer je gaat boren of slijpen op een manier die niet is voorgeschreven.

Installation on ground level

1. Our seats have 2 versions and are delivered assembled on galvanised rails.
   Note! Never screw the beams of the stips, this is not necessary for the assembly.

2. Both seating can be mounted on our standard wide retainers. Both the aluminum as the corten steel.
   Note! Remove dirt from the retaining wall before fixing the seats.
   Note! With these corten steel retaining walls it is mandatory to drill drainage holes in the top edge (under the seat). Per 500 mm you will need to drill 1 hole with a minimal diameter of 10 mm.

3. Screw the seating on the surface. Between the wooden beams are holes in the rails to fix the seats to the surface.
   Because of the variety of surfaces the seating can be fixed to, there are no screws delivered with the seating.
   Tip! If you fix to retaining walls we advise to use self-tapping screws.

ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
