

HEX manual

In this manual, we explain how to assemble the different parts of the HEX. With these parts, you can make different shapes. So it always fits perfectly in your garden.

NOTE!

- Excluding couplings, which have to be ordered separately.
- During the rusting process, rust water may come off the product.

Installation & mounting

PREPARATION

- Always place the HEX on a flat, solid surface.
- When placed against a wall, use the wall fixing holes. This provides extra rigidity.
- Connect the parts with connectors, both at the front and rear.

REQUIRED TOOLS (NOT INCLUDED)

- HEX connectors.
- Pliers for bending Corten steel.

Follow the steps below to place and assemble the HEX.

1. Place the HEX in the desired shape.
Note! Carefully stack the parts of the HEX on top of each other to ensure they do not fall.
2. Slide the coupler onto the corner where the HEX parts meet. See Figure 1.
3. Clamp the ends of the coupling piece inwards so that they are secure and cannot slide off. See figure 2.
4. Repeat steps 1 to 3 for each corner where parts line up.

Connect the parts with couplers, both at the front and back.
