

WATER BOWLS

Product description

With our different water bowls you easily transform any garden into an oasis. Water bowls are available in different sizes, suitable for both large and small gardens.

In addition to the Corten steel water bowls, there are also water bowls available with a coating in DB703 (anthracite). The Corten steel water bowls are not only available per single piece, but also per 20 pieces and thus extra affordable (Bocca & WNS5 per 10, WNS6 only per single piece).

Our Corten steel water bowls are multifunctional, they are made with a drainage hole, which can be sealed by means of a rubber stopper and can therefore also be used as a fire and plant bowl (do not use coated bowls as a fire bowl).

SPECIFICATIONS

General information

Our water bowls consist out of:

- Thickness: Corten Steel 3 mm
- Thickness: Polymer concrete 30 mm
- Closable drainage hole (excluding polymer concrete)
- 5 year warranty (descending)

Corten

- Brown-orange rust colour
- Delivered un-rusted
- Rust process takes 4-5 months
- BIO rust accelerator available

Coating

Colour: DB703 (anthracite)

Polymer concrete

- Dense smooth concrete structure
- Approaches RAL 7035
- No posttreatment required

IMPORTANT

Points of attention

- The pH of the water must be neutral (7).
- The products must be unpacked immediately after delivery.
- We only use Corten steel type S355J0WP.
- Coastal areas: We do not recommend using Corten steel within a radius of 2 km from a coastline.
- During the weathering process rust residue can come off the product.
- Drilling / grinding in the material is not permitted.

Maintenance

- Annual cleaning by removing coarse dirt by with clean tap water.
- Coated bowls must be maintained (cleaning and removing limescale)
- **Note!** Do not use a high-pressure cleaner or abrasive sponge.
- Adezz maintenance products are available (page 4).

PLACEMENT

INSTALLATION

1. Provide a level, solid surface. If not done carefully, this can cause tensions which can result in damage to the product.
2. Place your water bowl in the desired position.
3. On delivery the rubber stopper is already mounted in the water bowl. If it does become detached during transport, make sure that the plug seals the hole from above with the narrow side first.

Tip! Preferably use a large rubber mallet to insert the stopper.

4. Make sure the water bowl is level for the best result, when filled with water.
5. After the winter always check whether the rubber stopper still closes properly.

Tip! Use aquatic plants in the water bowl for an extra connection to the garden surrounding it.

ACCESSORIES

ACCESSORIES

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

CLEANER & PROTECTOR

We recommend cleaning our products at least twice a year. For optimal results, use the ADEZZ BIO Cleaner & Protector. Always read the descriptions on the packaging carefully before use.

RUST ACCELERATOR

Our Corten Steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

DESCALER

We recommend the use of ADEZZ BIO Descaler + to remove limescale from your products. Always read the directions on the packaging carefully before use.

CORTEN VARNISH

Corten varnish can be applied to the Corten Steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.
