### ABOUT THE MATERIAL

Over time, bamboo develops a natural patina. Exposure to UV light gradually lightens the surface, shifting from deep brown to a soft grey-brown. This colour change does not affect the material's quality – its strength and stability remain intact.

### OTHER FEATURES

- Warm, natural material that ages beautifully without maintenance for a timeless look
- A sustainable alternative to tropical hardwood
- Fast-growing and responsibly harvested – an environmentally friendly choice

### ABOUT THE MATERIAL

Kebony is enhanced in an environmentally friendly way using a biobased liquid.

Through heat treatment, the wood structure changes permanently, giving it the warm colour and strong properties of hardwood. The natural greying that appears over time is part of the material and does not affect its quality.

### OTHER FEATURES

- Sustainable alternative to tropical hardwood
- Strong, stable and ideal for outdoor use
- Low maintenance and developed to last for many years
