

Product information: Walls

We produce our Walls in Aluminum, Corten Steel (both available in bespoke sizes) and in Fibreglass (only in the standard dimensions). All walls come with a 5 year warranty.

Aluminum walls:

Aluminum walls are the perfect way to create a haven in your garden. It is possible to produce almost any size, easily calculated with our customisation tool on our website (after login). These are very rigid walls with a mounting strip on each side of the base. To clean this product, we recommend "Aluminum cleaner", specially developed for cleaning of Aluminum, which is available from us.

Standard colours are RAL 7021, 7035, 9010. Almost all other standard RAL colours are possible (beware of start-up costs).

Benefits Aluminum walls:

- Light and strong material
- Soothing appearance
- Almost all other standard RAL colours are possible (beware of start-up costs)
- Bespoke sizes possible
- Hollow construction

Corten Steel walls:

New to our range are the Corten Steel walls. These are extremely rigid walls, which can be mounted to any surface using the mounting strip along the length of the base. It is possible to produce almost any size, easily calculated with our customisation tool on our website (after login).

The advantage of our Corten Steel Walls is that they have a hollow construction, so you can simply add lighting etc.

Benefits Corten Steel walls:

- Cheaper than comparable walls
- Very rigid material
- Easy to create surprising views
- Natural appearance
- Bespoke sizes possible
- Easy self assembly lighting etc.

Fibreglass walls:

New to our range are the fibreglass walls. These are extremely rigid walls, which can be mounted to any surface using the mounting strip along the length of the base.

The advantage of our fibreglass walls is that they have a hollow structure, so you can simply add lighting etc.

The cleaning solution must be carefully chosen to ensure that it does not scratch the planter. Do not clean with steel wool, sand paper, solvents or any other abrasive materials, cleaning with a pressure washer can also cause damage. We have put together a special cleaning product: "Cleaner + Protector kit".

Benefits Fibreglass walls:

- Cheaper than comparable walls
- Light in weight
- Very rigid fiber reinforced material
- Easy to maintain
- The standard colour used is white RAL 9010. Also available in RAL colours: 7021, 7035
- Easy self assembly lighting

Important:

Our Walls can be mounted to a solid surface using the mounting strips (± 5 cm per side) along the length of the base. See example below:
