

Water blocks

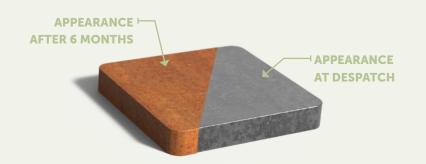

Water flows attractively over all four sides of this distinctive water feature. This means it can be positioned anywhere in the garden. The water streams gently over the edges into the collection tank, creating the effect of a soothing waterfall.

USE IN WINTER

- In freezing temperatures, always remove the plug from the power socket.
- Reduce the water level to at least 10 cm below the edge.
- We recommend using an ice preventer (available at any garden centre or hardware store).
- If the above conditions are met, the pump can remain in the water. You can also remove the pump from the pond and store it in water (above 0°C) over winter.

Material corten steel

Our corten steel water block is a distinctive and stylish garden ornament. Water bubbles up through the stainless steel nozzle, which is enhanced with LED lights. The water then flows smoothly down the sides of the block into the underground collection tank before being pumped back to the top. The LED lighting provides extra ambience at night.

Corten steel has an orange-brown patina, giving the water block a bold, warm look. The colour is the result of a natural layer of rust. Another name for corten steel is weathering steel: weather conditions have a positive effect on this material.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion, so the water blocks will last for many years

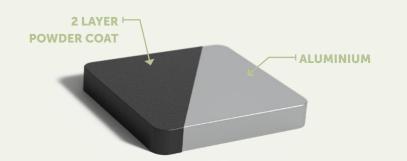

SPECIFICATIONS

- 5-year guarantee (pumps 2-year guarantee, LED lights 1-year guarantee).
- Includes LED lighting, pump and fountain.
- Corten steel water blocks are hard-wearing, weather-resistant, low-maintenance and durable.
- The corten steel has a standard thickness of 2 mm.
- Products are delivered without rust. The corten steel rusting process takes about 4-5 months, depending on weather conditions.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the product and stops the rust on corten steel flaking off.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop uneven rust patches.
- Our water features should be installed on a firm, level surface.
- We do not recommend using corten steel within 2 km of a coastline.
- The weathering process may cause rust run-off.
- The guarantee expires if you drill or grind in a way that is not specified.
- The water used in this product should have a neutral pH value (7) to protect the look and quality of the material.
- The pump may become clogged if green waste is allowed to build up inside the product. However, this water feature is simple to open and clean. After cleaning the nozzles, check the pump for blockages. Optionally, a filter can be placed between the pump and the fountain.
- Clean annually by spraying coarse dirt off the product with tap water.

Material aluminium

Our aluminium water block is a distinctive and stylish garden ornament. Water bubbles up through the stainless steel nozzle, which is enhanced with LED lights. The water then flows smoothly down the sides of the block into the underground collection tank before being pumped back to the top. The LED lighting provides extra ambience at night.

Aluminium is corrosion resistant: the water block can withstand freezing temperatures and other weather conditions without damage. You will be able to enjoy this product for many years. The aluminium water block is available in several colours.

Once constructed, the aluminium water block is given several finishing treatments. The material is roughened to allow better adhesion of the powder coating. This powder coating is available in a variety of colours and is applied with a strong adhesive primer. Finally, the aluminium is finished with a hard topcoat. This ensures that our water blocks are scratch resistant.

SPECIFICATIONS

- 5-year guarantee (pumps 2-year guarantee, LED lights 1-year guarantee).
- Includes LED lighting, pump and fountain.
- Aluminium water blocks are very robust, hard-wearing, resistant to corrosion and durable.
- The aluminium has a thickness of 4 mm.
- Scratch-resistant topcoat.
- We also supply professional maintenance products.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop patches of uneven discolouration.
- Our water features should be installed on a firm, level surface.
- The guarantee expires if you drill or grind in a way that is not specified.
- The water used in this product should have a neutral pH value (7) to protect the look and quality of the material.
- The pump may become clogged if green waste is allowed to build up inside the product. However, this water feature is simple to open and clean. After cleaning the nozzles, check the pump for blockages. Optionally, a filter can be placed between the pump and the fountain.
- Clean annually by hosing dirt from the product with clean tap water, followed by cleaning with detergent. Do not use a pressure washer and/or scouring pad for this purpose. This damages the coating.
- Limescale can be removed with ADEZZ Descaler BIO.

RAL COLOURS

Standard RAL colours are RAL 7016, RAL 7021, RAL 9005 and RAL 9016. For all other available RAL colours, please check our website. There is a start-up charge for these colours.

Note! Colours may vary from the image.

RAL 9005 RAL 9016

Installation

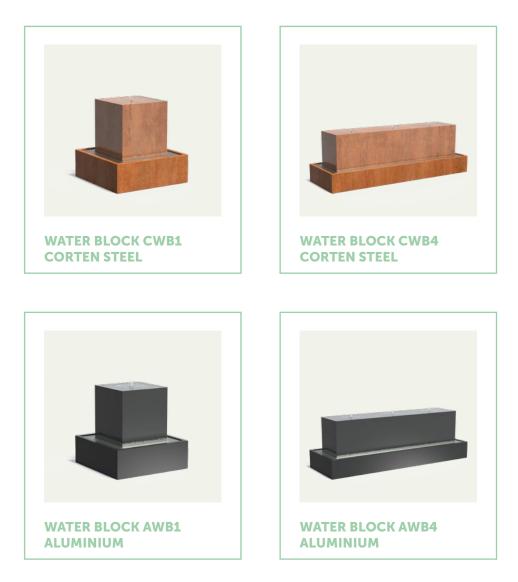

- Dig a hole in the ground at least as big as the base of the water block. The depth depends on the height of the base of the water block and the thickness of the foundation it sits on.
- Place a solid and level foundation at the bottom of the hole. Make sure there is an opening in the centre through which the power cables and water drainage can run.
- **3.** Next place the base of the water block on the foundation and place the pump inside.
- **4.** Lay the top of the water block on its side next to the base so the hose from the fountain can be connected to the pump.
- 5. Then run the pump and fountain power cord through the overflow and out from under the water block.
- **6.** Cover the base of the water block with gravel, it completely disappears from view and the water seems to run straight into the ground.

Models

For a complete overview of all our products and specifications, please visit www.adezz.com.

Accessories

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

CLEANER & PROTECTOR

ALUMINIUM

We recommend cleaning our products at least twice a year. For optimal results, use the ADEZZ BIO Cleaner & Protector. Always read the descriptions on the packaging carefully before use.

DESCALER

ALUMINIUM

We recommend the use of ADEZZ BIO Descaler + to remove limescale from your products. Always read the directions on the packaging carefully before use.

CORTEN STEEL

Our corten steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

CORTEN VARNISH

CORTEN STEEL

Corten varnish can be applied to the corten steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

7/8

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
