DESIGN TO GROW

Planters hardwood

Material hardwood

Due to the high durability class of the wood, this hardwood planter needs no further treatment. The planter will turn grey over time. This colour change does not affect the quality of the planter. The planter is constructed using only high-quality stainless-steel fasteners, and the base is lined with an anti-root membrane.

SPECIFICATIONS

- 5-year guarantee.
- Hardwood planters are strong and hard-wearing.
- We use only hardwood with durability class 2 in our hardwood planters.
- The hardwood has a thickness of at least 21 mm.
- The planter can be customised.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. This moisture can cause stains that are difficult to remove.
- All hardwoods turn grey when exposed to sun, rain and wind. The eventual colour partly depends on the initial colour of the hardwood.
- Wood is a natural product which shrinks or expands depending on temperature and moisture content. Regular oiling helps to stabilise the moisture content and limits shrinking and swelling. We recommend using Woca oil.
- We use stainless-steel screws. Like almost all woods, hardwood reacts when it comes into contact with iron. This can cause significant discolouration, which can look like mould.
- Remove metal shavings from tools (bits and drills) before use.
- Avoid contact with lawn fertiliser and cement. These contain traces of iron.
- The planter is not suitable for moving once filled.
- The guarantee expires if you drill or grind in a way that is not specified.

Installation

1. Provide a flat, solid surface. If not done carefully, it can create tension in the product which can result in damage to the product.
2. Reinforcements in planters are essential for the construction and dimensional stability of the planter. Reinforcements must never be removed!
3. Always provide sufficient breathing space (minimum 1 cm) around the planters to prevent moisture trapping.

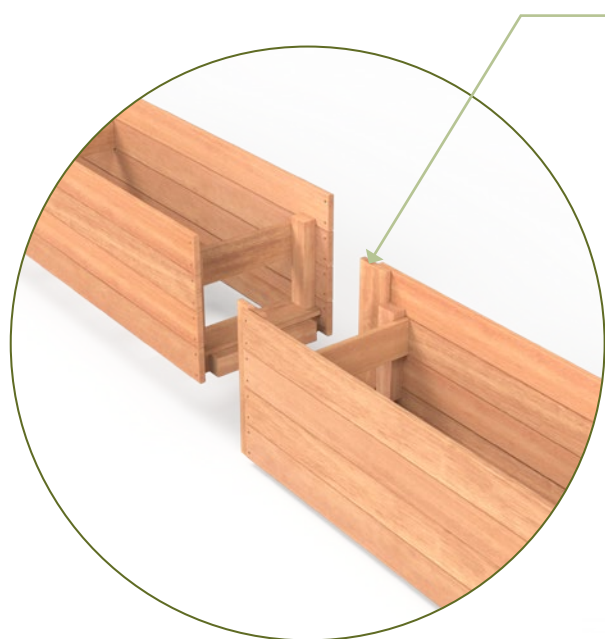

Planting advice

1. Fill the planter with about 10 cm of drainage material.
2. Place a permeable anti-root membrane over the drainage material.
3. Cover the membrane with soil suitable for your chosen plants.
4. Keep the drainage holes clear so that excess water can run off.

Infinity system hardwood

Thanks to the infinity system, it is possible to create an "infinitely" long planter (delivered in sections). All supplies for connecting the planters are included.

BLINDLY CONNECTED
Slide planters together
and connect with
provided screws.

Accessories

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

WHEELS

Wheels are an option on many of our products. Check www.adezz.com for the options per product (Total load capacity 450kg).

ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
