DESIGN TO GROW

U-profiles

U-profiles

Add extra dynamism to the garden with our U-profile overlay edging. Combine these overlay profiles with other corten steel elements to create a beautiful and unified garden design.

Material corten steel

Our corten steel U-profiles have a thickness of 2 mm and are available in five different widths. The U-profiles can be supplied in two formats: with two equal sides of 50 mm or two unequal sides of 50 mm and 150 mm. U-profiles have a length of 2300 mm and are supplied in packs of ten. The U-profiles cannot be sold individually. However, it is possible to order individual corner pieces.

Corten steel has an orange-brown colour, the result of a natural rust layer. Another name for corten steel is weathering steel: weather conditions have a positive effect on this material.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion, so the profiles will last for many years.

SPECIFICATIONS

- 5-year guarantee.
- Corten steel U-profiles are hard-wearing, weatherproof, low-maintenance and durable.
- The corten steel has a standard thickness of 2 or 3 mm.
- Five different widths: 54, 64, 104, 154 and 204 mm.
- Each U-profile has a length of 2300 mm.
- U-profiles are available in packs of 10.
- Corner profiles can be ordered individually.
- Products are delivered without rust. The corten steel rusting process takes about 4-5 months, depending on weather conditions.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the U-profile and stops the rust on corten steel flaking off.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop uneven rust patches.
- We do not recommend using corten steel within 2 km of a coastline.
- The weathering process may cause rust run-off.
- Clean annually by hosing off dirt with clean tap water.

Accessories

All our accessories meet the highest standards and are a highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

RUST ACCELERATOR

Our corten steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

CORTEN VARNISH

Corten varnish can be applied to the corten steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
